

8a old Boy

Nr.2671

- Skel. deep bite
- Skel. KL II (mandib. Retrognathie)
- Dentoalv. KLII/1-Syndrom (1 PD)-low angle
- Overjet->6mm w. sucking liphabit
- Severe Asthma (Cortison !!)

Diagnose:

- . skel. deep bite
- skel. KL II (mandib. Retrognathy!)
- dentoalv. KL II/1-syndrom (1 PD b.s.)
- Oberbite → 4mm
- Overjet ->6mm with sucking liphabit
- Overerurtion & protrusion of the lower front
- Asthma, Heuschnupfen, Hausstauballergie u.Snoring
- > bekommt deswegen täglich Cortison seit 1 Jahr
- > jetzt in Desensibilisierung

Treatment Plan--watch the generell FKO- info!!(www.drmangold.at

- . Vorerst mit KB und entspr. FKO- Gerät (Fränkel) den UK in toto nach vor vorbringen und gleichzeitig den Biss heben
- Den Rest dann mit fest. KFO, falls nötig
- At first with therapeutic bite(Antedisplacement of the mandibel!!) and the FKO-Appliance(Fränkel 1c and EOA) bringing the mandibel foreward and at the same time developing verticalisation
- The rest with MEAW-technik,if at all necessary!!

Fränkel

KB

Generell „between record“

- 9.07—no more Snoring
- Strong Decrease of Cortison
- Optimizing in Speech & Reading
- Mandibel moves step by step foreward
- Also Verticalisation
- Compliance is perfect!!
- Begin of the Functions-KFO has been 12.06!!
